

Killing Weeds the Environmentally Friendly Way

Here is a little help for those weeds that will inevitably arrive with all our desirable plants.

<https://www.gardendesign.com/how-to/weeds.html>

Two natural products:

1. Just spray white vinegar on the patio or walkway on warm sunny day. Its acidity will kill weeds.
2. 1 gallon white vinegar
2 cups epsom salts
1/4 cup Dawn soap

Mix and spray on weeds in morning, after dew has evaporated. Watch that it does not get washed toward nearby desirable plants with rain. Use sparingly as the salt can hurt plants over time and vinegar can change the soil pH. Best used on patios and walkways rather than on weeds in the lawn.
